### Tree Data Summary

T.P.O.

Large butt,

This tree has suffered a large amount of damage with the total crown removed and taken away (except for one large horizontal branch at the top of the trunk)

The trunk is very badly damaged and is hollow for its full height with a large section (20 inches) of the trunk missing for its full height. It is also badly damaged due to fire inside the trunk.

Since the above damage two new branches have grown vertically each side and above the top of the trunk, this shows the tree is very much alive.
