### Site Data

This is a small triangular section of level ground at the NE end of Field 60940003 where it is possible to plough. Ploughing any further to the S is impossible due to the steepness of the slope. At the time of inspection it had been deep ploughed hiding any archaeological features.

### History Summary

The field has remained unchanged from the mid 19th century until the present time, early 21st century apart from when it was merged with field 3 in 2008.
