Item Description FIELD

Site Data

This is a field of improved grassland used as pasture. From its northern boundary the terrain is level and the aerial photographs shows some undefined circular features in this area. About half way down the field the ground falls away quite steeply then rises sharply up to the Ripley Road forming a depression at the west end of which is Pond 60940140. At the SE end of the rising ground adjacent to the Ripley Road there may be a springhead which feeds the pond. The southern end of the field also contains what may be the remains of ridge and furrow ploughing which runs NNE to SSW. A revisit to investigate the undefined circular features is recommended.

History Summary

The field has remained unchanged from the mid 19th century until the present time, early 21st century apart from a subdivision into 2 fields around 2007.
