Item Description HUT CIRCLE

Site Data

A possible hut circle situated at the southern extent of High Wood, field 25. There is little evidence on the site apart from a suggestion in the undulation of the ground but its position seems to be confirmed by dowsing. It measures approximately 10m in diameter and appears to be surrounded by another circular feature measuring approximately 2.5m wide and situated approximately 4m from the perimeter of the hut. There appears to be a hearth in the centre of the structure. A significant fact is that the large bank and ditch that runs east through the adjacent woods, and roughly parallel with Gaker Walk, bends north east and curves around the site in order to respect the feature. The feature lies amongst trees and is covered with leaf litter. A second possible hut is situated approximately 30m to the south west.
