Item Description HUT CIRCLE

Site Data

Situated at the southern extent of High Wood, field 25, a possible hut circle measuring approximately 7m in diameter and surrounded by what seems to be an outer ditch and bank approximately 14m in diameter. There is another feature detectable in the centre which may be a hearth. It is not visible to any extent on the surface but is suggested by the configuration of the ground and its presence is confirmed by dowsing. Significantly it is respected by the boundary bank and ditch that runs through the woods parallel to Gaker Walk which bends around it. The area is largely covered with leaf debris and set about with trees. The feature is likely to be associated with another similar structure about 31m distant to the north west.
