Item Description ENCLOSURE

Site Data

A possible enclosure detected by the configuration of the ground and confirmed by dowsing. It is situated in the south western sector of field 28, Jacob Smith Park near the southern extent of the western boundary and adjacent to two apparent hut circles. It lies at the top of a gentle east facing rise. It measures approximately 12m in diameter and appears to have an entrance in the western quadrant. If associated with the hut circles it is possibly of Iron Age date.

History Summary

There is no trace of the site of the enclosure on any of the maps or aerial photographs listed on the Maps & Aerial Photos page.
