<b>NGR Linear</b>	434537	457850	434526	457844	
<b>Item Description</b>	BUILDING PLATFORM				

### Site Data

A building platform situated in the extreme south west corner of field 28, Jacob Smith Park. It abuts the boundary wall of the park and was detected by a change in the construction of the wall which suggests that the rear wall of the building was incorporated into the boundary structure. The precise rectangular form of the building was confirmed by dowsing. There is also considerable nettle growth. The structure appears to measure approximately 14m x 7m with a dividing wall in the centre across the shorter dimension. It may have been a barn associated with the adjacent farm which once stood some 50m to the north east.

### History Summary

There is no trace of the site of the building platform on any of the maps or aerial photographs listed on the Maps & Aerial Photos page.
