Item Description	TRACKWAY				

Site Data

This feature is named Red Hill Lane running from the Ripley Road in a NNE direction to join High Moor Lane. It is approx. 10m wide between mature trees but is heavily overgrown with Himalayan Balsom which has left a narrow trod down the centre of the track. From the junction with the Ripley Road at its southern end it is raised on a causeway to avoid the wet ground to the west and the pond in Field 60940005 immediately to the east. Along the top of the causeway a holloway has been formed in the cobbled surface. At NGR 433248 458509 there is a disused vehicular access 3m wide into Field 60940005. At this point the causeway ends leaving a holloway which rises steeply before leveling out and joining High Moor Lane.

History Summary

Red Hill Lane has remained unchanged from mid 19th century until the present, early 21st century.
